Lab Instructions

This page contains links to the individual lab instructions for Math 217.

- Lab 1[1] introduces you to the RStudio environment and shows you how to carry out basic descriptive statistics.
- Lab 2[2] shows you how to create graphs and carry out basic one-variable and two-variable analyses.
- Lab 3[3] shows you how to use RMarkdown to structure your work and create your report all in one document.
- Lab 4[4] offers you an opportunity to practice and solidify your learning from the first three labs, and introduces more two-variable techniques.
- Lab 5[5] shows you how to customize graphics outputs.
